

INFORMATION REQUEST FORM

Ross County Water Company (RCWC) recognizes the important role that water plays in any development project, whether for construction, consumption, or fire suppression. Our system spans most of Ross County, and parts of Vinton, Pickaway, Holmes, Jackson, and Pike Counties with hundreds of miles of main distribution lines, multiple pump stations, and towers. We regularly monitor the flow rates, pressures, and demands upon our system, which change depending upon seasonal usage and growth. We understand that developers often seek detailed information regarding our capacity when planning new residential or commercial projects. To streamline these requests, we require a potential developer to designate a single point of contact with whom we will communicate about water service. RCWC staff will communicate exclusively with that individual, and will not provide information to contractors, prospective bidders, or others involved in a particular project. This policy ensures that our communications are neither redundant nor subject to varying interpretations. Importantly, RCWC relies upon the information provided below together with the recommendations of its engineering consultants to respond to such requests. Please note that the projections are subject to change as system demands evolve, and that no commitment to provide service is made until RCWC enters into a written agreement. **Even then, RCWC does not guarantee that water will be available for fire protection and requires every customer to acknowledge in writing that RCWC is not liable for damage to persons or property due to inadequate fire flows as more fully set forth in R.C. 2305.04.**

Company Name: _____

Designated Contact: _____

Office No.: _____ Ext. _____ Cell No.: _____

Email Address: _____

Development Name: _____

Property Owner: _____

Permanent Parcel Number: _____

Property Address: _____

County: _____

Estimated Construction Start Date: _____

Type (check one): ☐ Residential ☐ Multi-Family
 ☐ Condominium ☐ Industrial/Commercial ☐ Other

No. of Units: _____

Domestic Demand: _____ GPM (Max) / _____ GPD / _____ Meter Size

Commercial Demand: _____ GPM (Max.) / _____ GPD

Fire Suppression Demand (Sprinkler): _____ GPM / _____ Duration (Hr.)

Backflow Device: _____

Concept Drawings (Please attach).pdf: _____

Site Plan/ Grade Plan (Please attach).pdf: _____

Additional Information:

Signature: _____

Print Name: _____

Date: _____

After completion, please submit to KChester@rosscowater.org
